

Assignments

The **Assignment** tool in Blackboard allows you to collect and grade student assignments electronically. Assignments can be added in any of the Content Areas and can also be part of a Learning Module or Lesson Plan. Once the Assignment is created, Blackboard automatically adds a column to the Grade Center, where all of the submissions are collected and later graded. Assignments can be individual or group. If it is a Group Assignment, only one grade needs to be entered and it will automatically be assigned to the other members of the group.

Creating an Assignment

1. With Edit Mode *On*, click **Assessments** in the course menu (or any other *Content Area* where the Assignment will be placed)
2. On the *Action Bar*, click **Create Assessments** and select **Assignment**
3. On the *Create Assignment* page, specify the Assignment **Name** and **Instructions**
4. Attach an additional file, if needed, by clicking the **Browse My Computer** button or dragging a file from your computer to the dashed box
5. Set the Assignment **Due Date** by selecting the check box and specifying the date and time
6. Enter the **Points Possible** or select a **Rubric**
7. Set additional settings such as individual or group submission, number of attempts, plagiarism checking, grading options, and date restrictions
8. Ensure the **Make the Assignment Available** checkbox is selected
9. Click the **Submit** button

Remember!

- All assignment file submissions by students count towards the available course quota
- If multiple assignment submissions are enabled, students can submit assignments multiple times; if each attempt is graded, Blackboard assigns the grade based on the last attempt, unless you change this in the *Display of Grades* options
